Seti d.o.o. has been developing and manufacturing paper products for the hospitality, hotel, and catering industry for over 30 years. Our napkins and other products are created with a focus on quality, functionality, and the reliability expected by the HoReCa segment.

Since 2024, Seti has been part of the Duni Group, Europe's leading provider of sustainable tabletop product solutions. This partnership gives us access to innovation and a global network, while we continue to preserve our local manufacturing tradition in Slovenia.

Our mission remains the same: to create products that help our partners deliver unforgettable experiences for their guests – in everyday moments as well as festive occasions.
